Understanding Your Scores in Renweb

Each standards-based class will have three Renweb categories: Success Skills, Formative Assessments, and Summative Scores.

Success Skills

- Your teacher may use a scale score or may record points for each assignment
- Neither the scale scores or the points will be used to calculate your summative scores.
- Success Skills could contain nonacademic factors such as attendance, participation, and preparedness for class.
- Success Skills could also contain practice work done outside of class
- The nonacademic factors and the practice work will give your teacher valuable feedback that will help him/her guide your learning.

Formative Assessments

- Teacher records points based on the 4-point scale in the proficiency scale
- While assignments recorded in Formative Assessments do not directly record points that affect your grade, your teacher uses the work in the category as "mounting evidence" toward your summative score for each standard
- Mounting evidence means that the teacher will examine the pattern of scores from the assignments and assessments connected to a particular standard and will use those scores to assign a summative score for that standard, depending on the students' demonstration of proficiency.
- Formative Assessments will contain assignments such as practice work done in class, quizzes, and final assessments.
- Each assignment will have the standard and the level of proficiency attached to it. An example: **GCER1 - I can write precise claims. (Level 3)**
- The assignment will then be scored according to the proficiency level.

Summative Score

- Teacher records points on the 100-point scale for each standard you have attempted
- A score is assigned from the assignments and assessments that you have attempted in class (Formative Assessment category)
- Teachers use the mounting evidence from your Formative Assessments on a particular standard, not an average, to calculate your Summative Score.
- These scores will be averaged by Renweb and will give you a traditional grade.

The categories will be numbered when entered into the gradebook: 1. Success Skills, 2. Formative Assessments, and 3. Summative Scores
